

COMP 2710 Software Construction

Dr. Xuechao Li

Auburn University

Goal and Objectives

Your Future Career

Careers: Comp. Sci & Eng., Electrical Eng.

Phone and On-site Interviews

Programming skills

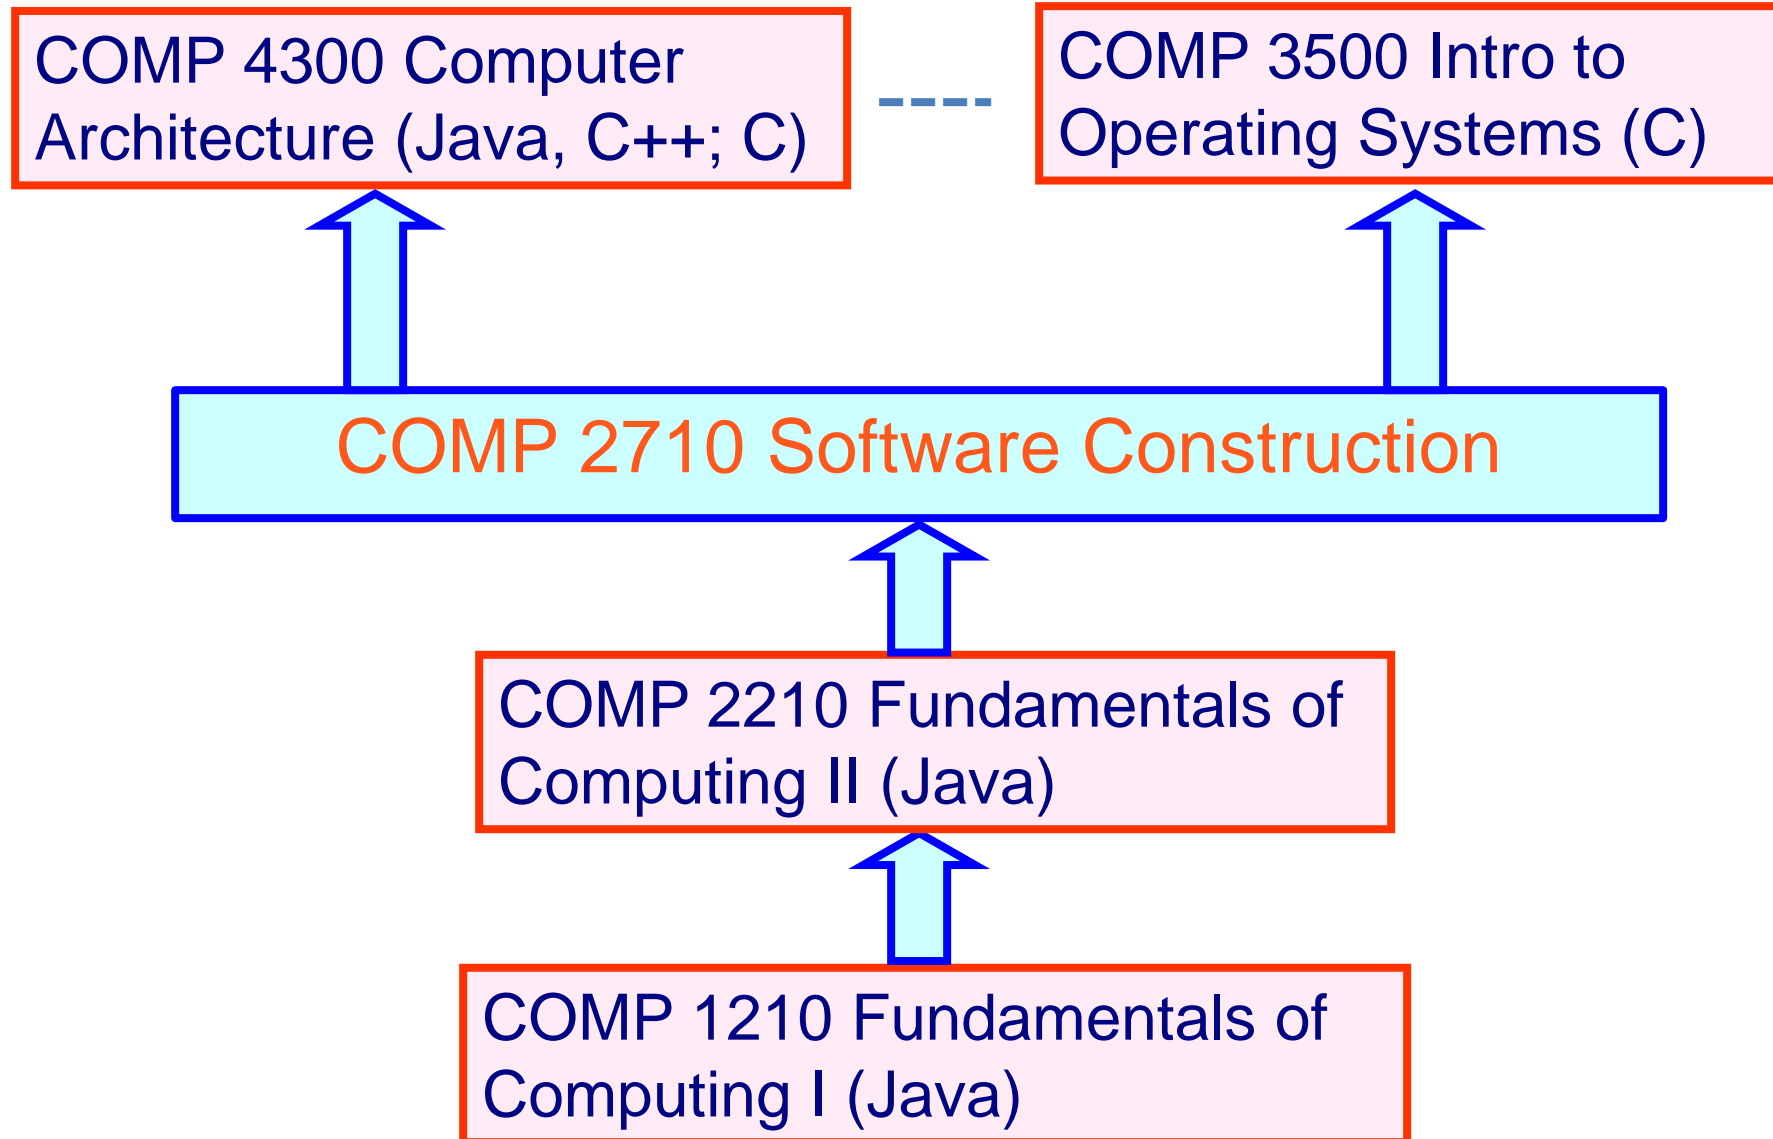

Problem solving skills

Personality

Quickly learn a new programming language

Programming experience

Why Study Software Construction?

C++ Application

- **Adobe Systems:**

All major applications are developed in C++:

- Photoshop & ImageReady,
- Illustrator,
- Acrobat,
- InDesign,
- GoLive,
- Frame (mostly C, some C++)

C++ Applications (cont).

- **Amazon.com**: Software for large-scale e-commerce.
- **Google**: web search engine, etc.
 - Chromium browser.
 - Google file system.
 - MapReduce large cluster data processing.
- **HP**: Here is a tiny fraction of HP's C++ apps:
 - C, C++, Fortran90 compilers, and linker for the new HP IA64 platform (these add to more than 1 million lines of C++ code).
 - SAM (HP's system management utility)
 - Some of the networking libraries in HP-UX
 - Java VM core
- **IBM**:
 - OS/400.
 - K42: a high performance, open source, general-purpose operating system kernel for cache-coherent multiprocessors.

Parallel Applications on Supercomputers

Why Study Software Construction?

Position	Software Engineer
Location	Seattle, WA
Company	Amazon
Part of the Job Description	<p>Basic Qualifications</p> <ul style="list-style-type: none">* Bachelor's Degree or better in Computer Science or related field.* 4+ years professional experience in software development.* Computer Science fundamentals in object-oriented design, problem solving, data structures and algorithm design* Proficiency in, at least, one modern programming language such as C++, C# and Java. Perl experience a plus.

Why Study Software Construction?

Position	Software Test Specialist
Location	San Jose, California
Company	IBM
Part of the Job Description	Applicant should possess a strong programming language such as C, C++ or Java. Command of a non-Windows platform such as Linux or UNIX is also a plus. The applicant should possess any number of the following abilities: Java, C++ , C, Linux , Windows, TCP/Networking, Websphere, DB2, Rational Tools, Project Management.

Why Study Software Construction?

Position	Senior Software Engineer
Location	Washington, DC
Company	Intel
Part of the Job Description	<p>You should possess at least a Bachelor of Science degree and possibly more advanced degrees with extensive experience as graphics programmer in the video game industry. Additional qualifications include:</p> <ul style="list-style-type: none">- Solid understanding of Direct X*, OpenGL*, and Shaders*- Strong experience with C/C++ language and Windows* development environment- A good communicator and comfortable with public speaking- Multithreading experience and computer architecture knowledge would be an added advantage

Why Study Software Construction?

Position	Software Engineer , Compilers
Location	Mountain View, CA
Company	Google
Part of the Job Description	<p>Responsibilities:</p> <ul style="list-style-type: none">* Performance analysis* Development of advanced tools* Implement state of the art compiler optimizations* Integration into the GCC public repository <p>Requirements:</p> <ul style="list-style-type: none">* Comprehensive and recognized knowledge in compilers, optimization technology, and algorithms* Deep understanding of computer architecture* Strong debugging/analytical skills* Solid practical C/C++ experience

Why Study Software Construction?

U.S. Engineering Salaries

What will you get out of COMP2710?

- **Analyze problems** to determine system requirements
- Develop **object-oriented software** designs that map to requirements identified in analysis
- Develop software using sound **programming principles**
- Grasp both **C++ Syntax and Semantics**
- Have experience in developing **non-trivial software** applications
- Understand concepts of **data abstraction**, efficiency, and **memory management**
- Understand how to perform **software testing**.

Topic Coverage (Outdated)

- I/O: Basic, File
- Functions: Basics, Overloading, Templates
- Arrays
- Structures & Classes: Basics, Constructors
- Vectors and Iterators
- Operator Overloading
- Strings and Streams

Your Programming Environments

- Do you have a laptop?
- What operating systems are installed on your laptops?
Windows, Mac OS, Linux?
- Do you use Linux command lines?
